

1

2 Fig S1. Surface mass concentration ($\mu\text{g}/\text{m}^3$) of sulfate aerosols in 2060-2080. (a) RCP8.5 (b) RCP4.5 minus
 3 RCP8.5. (c) RCP8.5 with fixed aerosols minus RCP8.5. The global average of (c) is six times larger than
 4 that of (b). (c) is the same as Fig 3(d), except for color scale.
